FUND INFORMATION

INVESTMENT OBJECTIVE			INVESTMENT STRATEGY	ASSET INFORMATION	
The Fund seeks long-term capital appreciation.			Our investment strategy is based on a disciplined, bottom-up, low P/E approach to stock selection. We invest in undervalued companies, which exhibit strong fundamentals, low debt-to-capital, strong cash flow, dividends and historic earnings growth which our analysis indicates will persist. We seek these fundamentally strong companies and avoid speculative stocks and potential bankruptcies that may impair client returns.	Total Fund Assets	Holdings

OVERALL MORNINGSTAR RATING (as of June 30, 2010)

Small Cap Value	Overall Rating	3-Year	5-Year	For each fund with at least a three-year history, Morningstar calculates a Morningstar Rating™ based on a Morningstar Risk-Adjusted Return measure that accounts for variation in a fund's monthly performance (including the effects of sales charges, loads, and redemption fees), placing more emphasis on downward variations and rewarding consistent performance. The top 10% of funds in each category receive 5 stars, the next 22.5% receive 4 stars, the next 35% receive 3 stars, the next 22.5% receive 2 stars, and the bottom 10% receive 1 star. (Each share class is counted as a fraction of one fund within this scale and rated separately, which may cause slight variations in the distribution percentages.)
DRSVX	5 Stars	4 Stars	5 Stars	
Number of Funds in Universe	371	509	425	
MORNINGSTAR % RANK IN CATEGORY				
DRSVX	1	16	5	

The Overall Morningstar Rating™ for a fund is derived from a weighted average of the performance figures associated with its 3-, 5-, and 10-year (if applicable) Morningstar Rating metrics. The Fund had the following ratings for the 3 and 5-year periods respectively: 16 and 5 out of 509 and 425 Small Cap Value Funds.

PORTFOLIO MANAGEMENT

WHY INVEST IN DREMAN FUNDS?

Track Record - through predecessor firms, Dreman Value Management has successfully employed the same disciplined, contrarian, deep value investment management style for over 30 years.

Experienced Team - David Dreman the Chief Investment Officer has over 50 years and Cliff Hoover the co-Chief Investment Officer has over 20 years of portfolio management experience.

Style Discipline - the philosophy and investment process reflects a disciplined approach that precludes style drift and results in low turnover.

Academic Research - studies have consistently shown the outperformance of value strategies vs. growth strategies over time.

PORTFOLIO MANAGERS

David Dreman is the Founder, and Chairman of Dreman Value Management, L.L.C. and also the firm's Chief Investment Officer. David founded his first investment firm, in 1977 and has written 4 books on contrarian value investing.

E. Clifton Hoover joined the firm in 2006 as the co-Chief Investment Officer and Portfolio Manager. He has over 24 years of experience in the investment management industry and has built his career on the low P/E approach to investing.

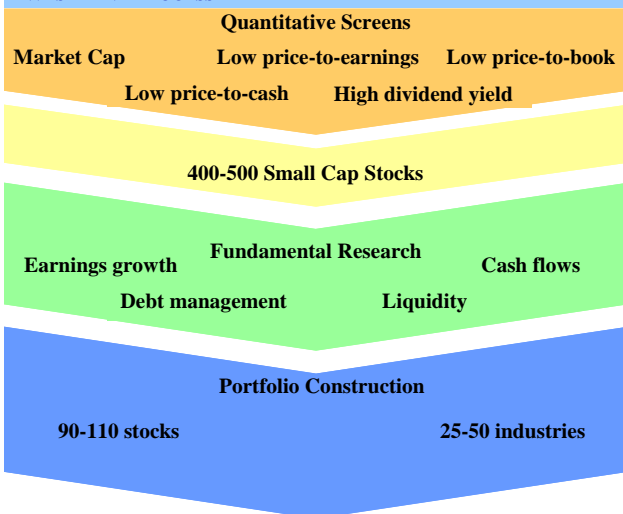

F. James Hutchinson joined the firm in 2000 and is the President and a Portfolio Manager. He has over 35 years of experience and is responsible for the overall firm marketing functions and development of the firm's distribution network. In addition, he is co-Portfolio Manager for certain of the Dreman Funds.

Mark Roach joined the firm in November 2006, as a Managing Director and Portfolio Manager. He has over 18 years of investment experience and has been a student of the contrarian value process throughout his career.

INVESTMENT PHILOSOPHY

- Invest in undervalued companies, exhibiting strong fundamentals, above-market dividend yield, and historic earnings growth
- Discipline without style drift - consistently applied philosophy has produced long-run performance above the market and value benchmark
- Markets are not perfectly efficient and behavioral finance plays a considerable role in investor actions and over-reactions as well as in stock price movements

INVESTMENT PROCESS

Small-Cap investing involves greater risk not associated with investing in more established companies, such as greater price volatility, business risk, less liquidity and increased competitive threat. Value stocks may remain undervalued for extended periods of time and the market may not recognize the intrinsic value of these securities.

The percentage rank in category is the fund's total-return percentile rank for the specified time period relative to all funds that have the same Morningstar category. The highest (or most favorable) percentile rank is 1 and the lowest (or least favorable) percentile rank is 100. The top-performing fund in a category will always receive a rank of 1. Percentile ranks within categories are most useful in those categories that have a large number of funds.

¹The Russell 2000® Value Index is a widely recognized unmanaged index of equity prices and is representative of a broader market and range of securities than is found in the Fund's portfolio. The Index returns do not reflect the deduction of expenses, which have been deducted from the Fund's returns. The Index returns assume reinvestment of all distributions and do not reflect the deduction of taxes and fees. Individuals cannot invest directly in the Index, however, an individual can invest in exchange traded funds or other investment vehicles that attempt to track the performance of a benchmark index. The Russell 2000® Value Index measures the performance of those Russell 2000 companies with lower price-to-book ratios and lower forecasted growth values.

P/E is a ratio of a company's current share price compared to its per-share earnings. P/B is a ratio used to compare a stock's market value to its book value. It is obtained by multiplying the number of shares outstanding by their current price per share. R-squared is a statistical measure that represents the percentage of a fund's movements that can be explained by movements in the benchmark index. Standard deviation is a statistical measure applied to the annual rate of return of an investment to measure the investment's volatility.
